

YOUR LIBRARY

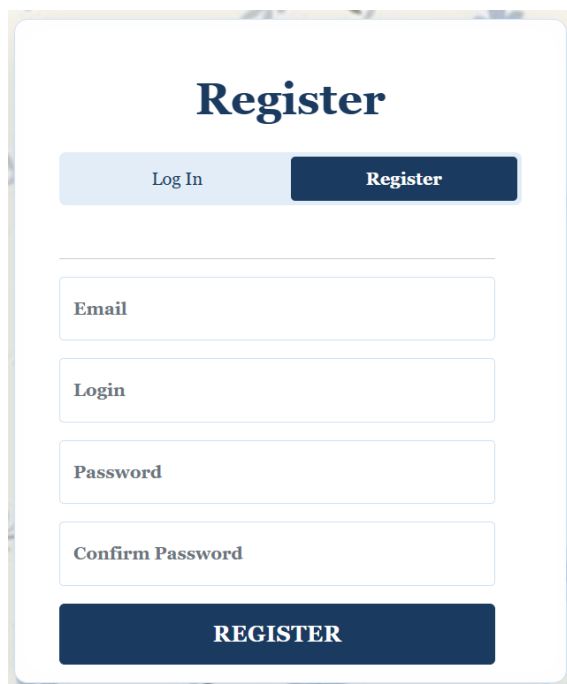

Application User Manual

MANUAL FOR THE MANUAL

If a sentence appears instructing you to proceed to another stage of the manual, please go to the heading with the corresponding name and continue reading from that point. If there is no sentence instructing you to proceed to another section of the manual, you should read from top to bottom and not skip anything.

The correct launch of the application will present us with the login page.

REGISTRATION

The image shows a registration form titled "Register" in a dark blue serif font. Below the title are two buttons: "Log In" in a light blue box and "Register" in a dark blue box. The form contains four white input fields with blue borders, labeled "Email", "Login", "Password", and "Confirm Password" in a small blue font. At the bottom of the form is a large dark blue button with the word "REGISTER" in white, all-caps, sans-serif font.

If you are a new user and do not yet have an account in the application, you should click the blue text below, “Register as a new user”, or click the “Register” tile located below and to the right of the first text, “Log in”.

To register as a new user, you must complete 4 white fields. Respectively: email address in the “Email” field, login, i.e. the displayed username, in the “Login” field, password in the “Password” field, and confirmation of the same password in the “Confirm Password” field.

The user account password should contain: at least 1 uppercase letter, at least 1 digit, and at least 1 character that is neither a letter nor a digit.

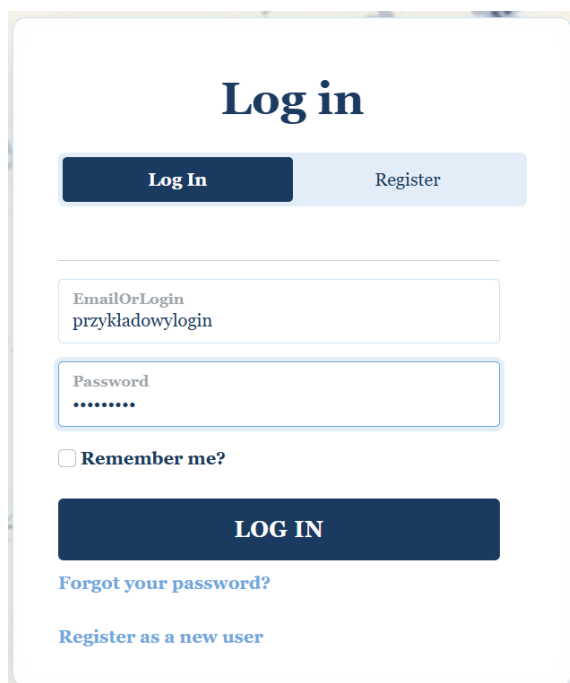

The password should be between 6 and 100 characters in length.

If the password does not meet the requirements, the user will see a red warning above the “Email” field; the “Password” and “Confirm Password” fields must be completed again so that the requirements are met.

The user's login and email address should be unique; if someone has already registered an account with a given login or email address, it is not possible to create a new account with duplicate details. When attempting to register using an already occupied login or email address, the user will see a red warning; the data in the specified field or fields must then be changed to unique values.

If the user meets all of these requirements when completing the fields, after clicking the dark blue “Register” button, a new account will be created, which they will then be able to use during further use of the application.

LOGGING IN

☐ Remember me?

LOG IN

[Forgot your password?](#)

[Register as a new user](#)

If you already have an account in the application and have completed the registration stage, when launching the application, you must log in in order to use it. To do this, you must complete the “EmailOrLogin” and “Password” fields. In the first one, enter either the email address or the login of your account; it is entirely up to you which one you choose. In the second field, enter your password. All the details you enter should be current. Then click the dark blue “LOG IN” button to log in and use the application.

You can also tick the “Remember me?” checkbox; after entering your login details and clicking this box, future logins will be much faster as a result.

PASSWORD CHANGE OPTION

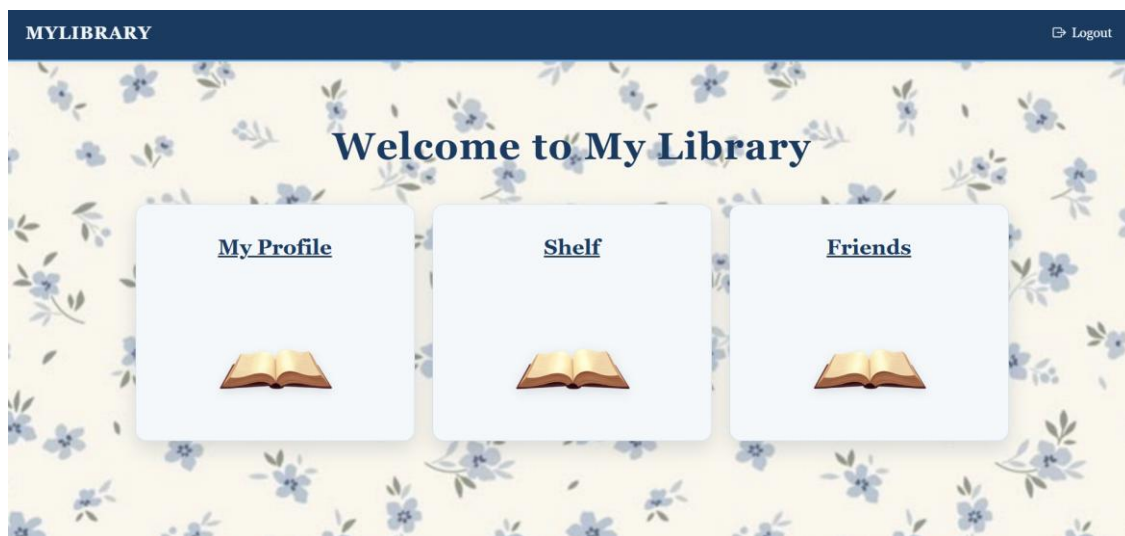

Forgot your password?
Enter your email.

Reset Password

[← Back to Login](#)

Below the “Log in” button, there is a blue text reading “Forgot your password?”. If you have forgotten the password to your account, click this text. Clicking it will redirect you to a view where you need to complete one field, “Email”. Enter the email address of the account for which you have forgotten the password, and then click the dark blue “Reset Password” button below. This will cause an email entitled “Reset Password” to be sent to your email address. In it, you will receive a short message ending with “clicking here”, highlighted in blue. Click this highlighted fragment and you will be taken back to the website. There, complete the three fields: “Email”, “Password”, and “Confirm password”, respectively with your email address, your new password, and confirmation of the new password. The password creation requirements are the same as when registering a new user. If you complete the fields correctly and click the blue “Reset” button below, your account password will be reset to the one you have just entered. Click the blue highlighted text fragment “click here to log in” to log in to the application.

WELCOME TO MY LIBRARY

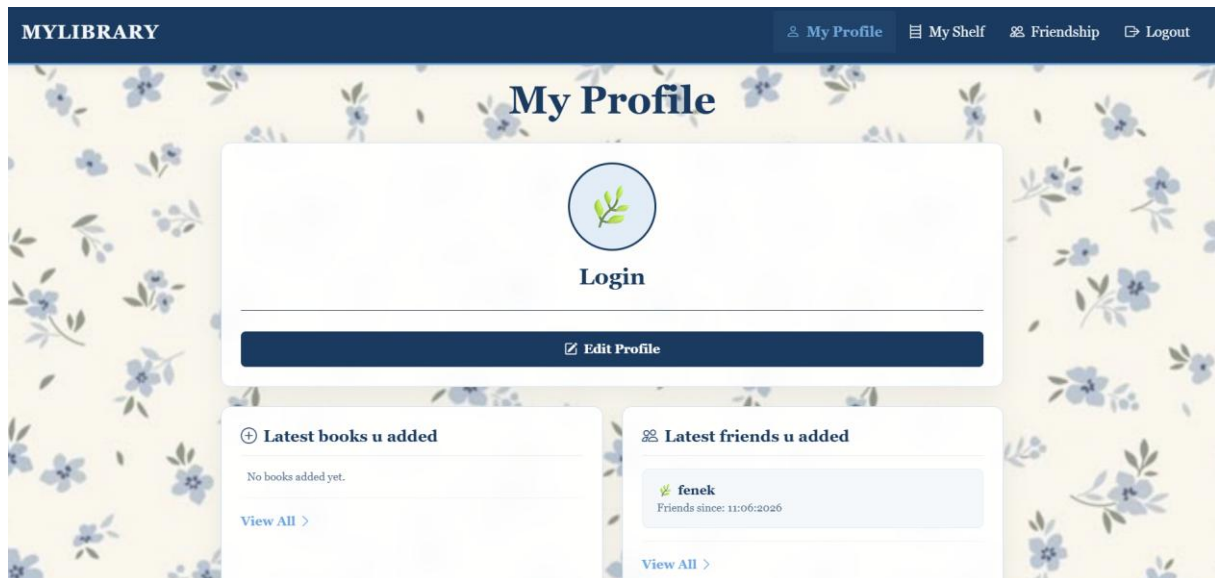

After logging in, we can see three sections that we can navigate to: “My Profile”, “Shelf”, and “Friends”. Click on any of them to enter the selected section. It does not matter which one we enter first, as we can freely move between these categories afterwards.

When we navigate anywhere from the “Welcome to my library” view, in the top left corner there is the text “MYLIBRARY”, which we can click to return to the “Welcome to my library” view. However, a much faster solution is to use the menu in the top right corner on the dark blue background. In this menu, we have the following options: “My Profile”, “My shelf”, “Friendship”, and “Logout”, each of which can be clicked. The first 3 of them take us to the page view corresponding to the name of the option we click. The last one, “Logout”, logs us out of the account and takes us to the initial login/registration page.

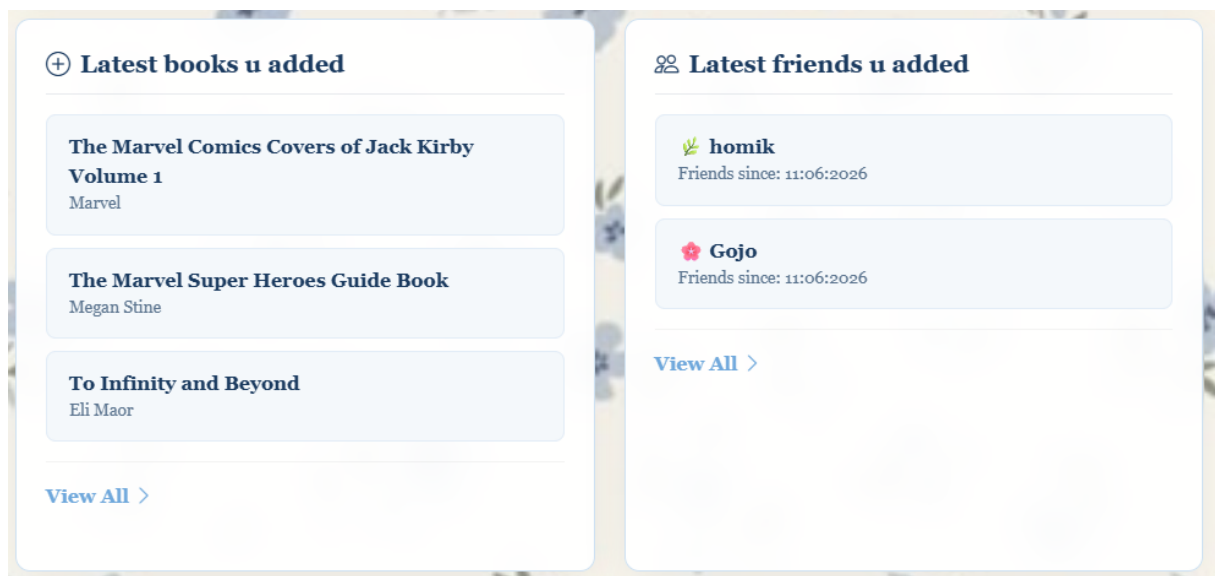

3 MAIN SECTIONS

SEKCJA MY PROFILE

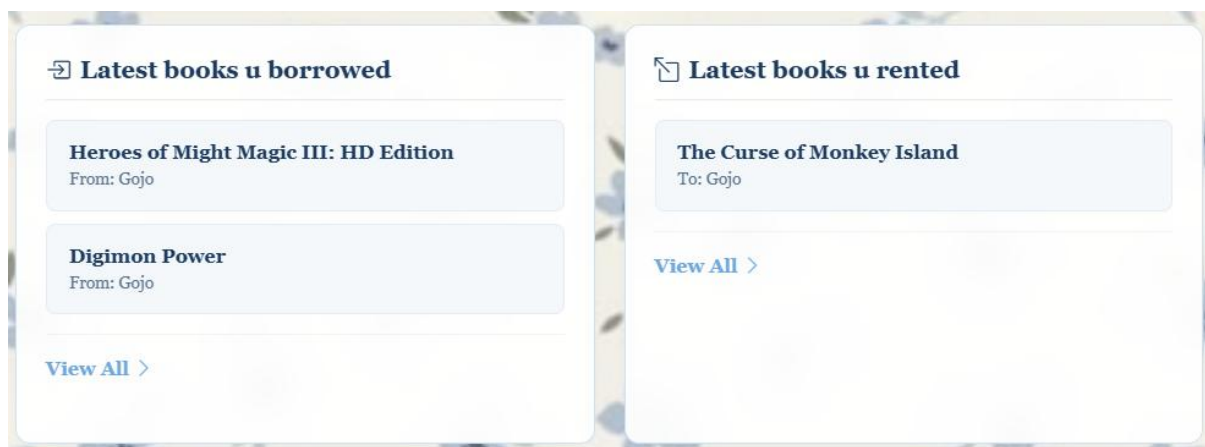

If we are in the “My Profile” section, we can see our avatar in a circular field in the centre, and our login (Nickname) below it. Beneath them, there is a dark blue “Edit Profile” button; after clicking it, we will be able to edit various pieces of information about our profile.

If we scroll slightly down using the scrollbar on the right-hand side of the screen, we can see four fields below; these are for preview purposes.

The “Latest books u added” field displays the three most recent items that you have added to your bookshelf. If you click on this field or on the blue “View All” text located in this section, you will be taken to the “My Shelf” section.

The “Latest friends u added” field displays the three most recent friends that you have added to your account. If you click on this field or on the blue “View All” text located in this section, you will be taken to the “Friendship” section.

Pole „Latest books u borrowed” pokazuje trzy ostatnie pozycje książek które masz pożyczone (jeszcze nie zwrócone). Większy napis przy każdej z pozycji to tytuł pożyczonej książki, a mniejszy szary napis wskazuje on login przyjaciela od którego książkę mamy pożyczoną. Klikając na to pole, albo na „View All” zostaniesz przeniesiony do sekcji „Friendship”.

Pole „Latest books u rented” pokazuje trzy ostatnie pozycje książek które pożyczyłeś komuś z twoich przyjaciół (i nie zostały jeszcze zwrócone). Większy napis przy każdej z pozycji to tytuł pożyczonej książki, a mniejszy szary napis wskazuje on login przyjaciela któremu daną książkę pożyczyliśmy. Klikając na to pole, albo na „View All” zostaniesz przeniesiony do sekcji „Friendship”.

EDIT PROFILE

Here you can edit your profile details. You can change your avatar, login, email, and password at the same time, and after clicking the dark blue “Confirm” button, all valid changes will be saved. You may edit one or several things in your profile at once; regardless of what the user changes, the dark blue “Confirm” button must be clicked at the end to save the changes. The fields to be changed must be completed correctly. If even one of them is filled in incorrectly, confirming the changes with the “Confirm” button will not save any of the entered changes and will instead display a message indicating where the error is. The individual errors and their explanations are listed in the paragraphs below. If, however, you do not wish to change anything, click the white “Cancel” button to leave the profile editing page, and any changes made will not be saved.

Changing the Avatar

As the avatar/profile picture for your profile, you can either choose a ready-made icon from the 10 available options or upload your own image file. By default, the “Branch with leaves” icon is selected. All icons are displayed in a row in small squares with a grey border. To set one of the displayed icon options, simply click on the chosen one; the selected option will have a dark blue highlighted background. If you wish to add your own image, click the “Choose Image” button, select an image (the allowed file formats are: ".jpg", ".jpeg", ".png"; the maximum allowed file size is: 5MB), and the file name should then be displayed next to the “Choose Image” button.

If no image file has been uploaded, the user's avatar will be set to the selected icon (with the dark blue background). If a valid image has been uploaded, it will be resized and fitted into the profile picture, and regardless of whether the icon is changed, the image will take “priority”. If you wish to use an icon again instead of the image, click “Choose Image”, do not select any image, and save the changes; the selected icon will then be used again.

Changing Login

During registration, the user's login was chosen; however, it can be changed. Simply enter a new login in the field below the “Change Login:” label. The only restriction is that the user cannot change it to a login that is already being used by another user. If a given login is already taken and the user clicks “Confirm” or another field, the changes will not be saved, and a red message will be displayed below the field: “Login already taken”. In such a situation, a different login must be entered so that the warning disappears, and the changes should then be confirmed by clicking “Confirm”.

Changing Email

During registration, the user's email address was chosen; however, it can be changed. Simply enter a new email address in the field below the “Change Email:” label. The only restriction is that the user cannot change it to an email address that is already being used by another user. If a given email address is already registered and the user clicks “Confirm” or another field, the changes will not be saved, and a red message will be displayed below the field: “Email already registered”. In such a situation, a different email address must be entered so that the warning disappears, and the changes should then be confirmed by clicking “Confirm”.

Changing the Password

During registration, the user's password was chosen; however, it can be changed. Simply enter a new password in the field below the “Change Password:” label, and then enter the same new password again in the field below the “Confirm New Password” label. The password should meet the same requirements as during registration. The user account password should contain: at least 1 uppercase letter, at least 1 digit, and at least 1 character that is neither a letter nor a digit. The password should be between 6 and 100 characters in length. If even one of these requirements is not met, a red message, one of four possible messages, will appear below the field under “Change Password”, and the profile changes will not be saved.

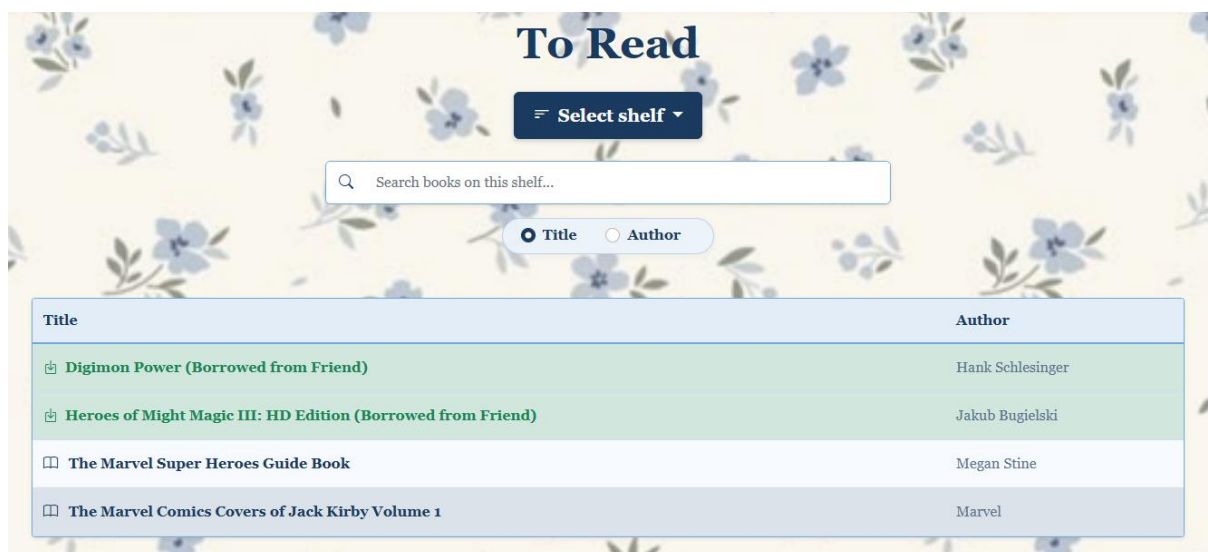

What to do if one of them appears:

- “Passwords must be at least 6 characters.” - your password should be longer than 6 characters; make it longer by adding a few characters
- “Passwords must have at least one non alphanumeric character.” - your password should contain at least 1 special character; add one
- “Passwords must have at least one digit (‘0’-‘9’).” – your password should contain at least one digit; add one
- “Passwords must have at least one uppercase (‘A’-‘Z’).” - your password should contain at least one uppercase letter; add one, or change one of the existing letters to uppercase

The last case that may occur is that the password in the field under “Change Password” is different from the one in the field under “Confirm New Password”. In such a situation, the message “Passwords do not match” will be displayed at the top, and the changes will not be saved. The passwords should then be entered again in both places, ensuring that they are identical.

The password can be changed any number of times, and the most up-to-date password is required for logging in.

SEKCJA MY SHELF

This section is responsible for storing our books organised on different shelves. At the top of the page, there is a dark blue “Select shelf” button. Clicking on it displays a drop-down list of shelves whose contents we can view. The available options are: “Reading”, which contains books currently being read; “To Read”, which shows books we want to read in the future; “DNF” (“Did Not Finish”), meaning books whose reading we have abandoned; and “Read”, which is the shelf containing books that have been completed. You can click any of these options to switch the view to the selected shelf. Above the “Select shelf” button, a dark blue label is displayed showing the name of the shelf that we are currently viewing. If any books have been added to that shelf, they will be displayed in this area.

ADDING BOOK

To add a book to your bookshelf, click the dark blue button with a plus sign, located in the bottom right-hand corner.

There are two ways to add a book. Proceed to the chosen step of the manual: “MANUAL BOOK ADDITION” or “AUTOMATIC BOOK ADDITION”.

MANUAL BOOK ADDITION

The first method is to add a book manually; click the grey switch located to the left of the text “Add book manually”.

In the “Your book” section, first there is the text “Upload book cover image”; click the “Choose file” button located below it. Select an image file (acceptable formats include “.jpg”, “.jpeg”, “.png”). After selecting it, instead of “No file chosen”, the file name should appear, indicating that the image has been attached correctly.

The following fields are text fields. The fields under the labels “Title”, meaning the title, and “Author”, meaning the author, are mandatory. The remaining fields may be completed but do not have to be. These are the fields under the labels: “Genre”, meaning genre, “Age Rating”, meaning age classification, and “Description”, meaning a short description of the book.

Now proceed to the step of the manual “FIELDS TO COMPLETE WHEN ADDING A BOOK”.

Community Reviews

No one has reviewed this book yet. Be the first!

AUTOMATIC BOOK ADDITION

The second method is to use the automatic search tool. In the field below the “Search book” label, enter either the first name or surname of the author of the book you are looking for, or its title. While typing/after entering something, a list with a scrollbar will be displayed below. You can use the scrollbar to browse the displayed items. The item you wish to add should be clicked (when hovering over an item, a light blue background will be visible, which lets us know that we are clicking the correct item).

The fields in the section labelled “Your book” will be filled in automatically and cannot be changed. On the right-hand side, we can see the “Community Reviews” section. If any users of the application have added their review of the book, it will be displayed in this section. Each review box displays the login of the user who wrote it, the date when it was written, as well as the rating and comment. These reviews are for viewing only; clicking on them will not cause anything to happen.

"Love this game, and love this book"

FIELDS TO COMPLETE WHEN ADDING A BOOK

Let us focus on the fields in the “My shelf” section. The field below the “Media format” label can be clicked, and a list will expand from which we can choose whether the book we are currently adding:

is a physical book – click “Printed”

is an eBook – click “Ebook”

is an Audiobook – click “Audiobook”

the book format that we select now can be changed later.

The next field to complete is the one below the “Read status” label. Clicking this field will expand a list from which you can choose whether the book we are currently adding:

has been read – click “Read”

is currently being read – click “Reading”

we plan to read it – click “ToRead”

we have abandoned reading it – click “DNF”

the reading status of a given book can be changed later.

If you selected the “Printed” format, proceed through the step of the manual: “PRINTED FORMAT” below. If you selected any other format, proceed to the step of the manual below the heading “END OF PRINTED FORMAT STEP”.

PRINTED FORMAT

 **My shelf**

Media format
Printed

Read status

 **Options**
☐ Do you have a bookmark in your book?
☐ Do you own this book?

Where do you keep your book?
e.g. Bedroom, desk, main shelf...

Your notes
Add your personal thoughts...

← Cancel

✓ Save book

The next thing you must do is complete the box named “Options”. There are two questions there: (if you have a format other than “Printed”, skip this step of the manual)

“Do you have a bookmark in your book?” – do you have a bookmark for this book? If yes, click the grey square to the left of this question, and proceed to the next one. If not, do not click anything and proceed to the next question.

“Do you own this book?” – is this book your property? If yes, click the grey square to the left of this question and proceed to the next one. If not, do not click anything and continue with the manual.

Next, below, you will see the text “Where do you keep your book?”, meaning where do you keep your book? If you wish, you may complete the field below this text and write whatever you consider appropriate in response to this question.

END OF PRINTED FORMAT STEP

The next field is the one below the “Your Notes” label. In it, if you wish, you may (you may, but do not have to) write your own notes about this book. These notes will only be visible to you.

If you previously selected the book status “Read” or “DNF”, then proceed to “READ STATUS” in the manual. If you did not select either of these, proceed to “END OF READ STATUS”.

READ STATUS

✓ Save book

Additionally, you have the section labelled “Add your review” to complete. This section is responsible for your rating of the book, and you may, but do not have to, complete it. Your review will be visible to you as well as to other users. Under the text “Your Rating (1-10)”, you can click the “—Choose rating –” field. A scrollable list will then expand, where you will see numbers from 1 to 10 in increments of 0.25. Click on any of these numbers; it will represent your rating. Below is the text “Review Comment”, and beneath it a field where you can enter your comment about this book.

END OF READ STATUS

To save the completed fields and the entire book to your bookshelf, click the dark blue “Save book” button at the very bottom of the page. If, however, you have changed your mind and do not wish to add a new item, click the “Cancel” button. Both buttons will take you back to the “My Shelf” section view.

FILTERING A SHELF

On every shelf, book filtering works in the same way. If you have many items on a shelf and want to quickly find a specific one, use the filtering options. Choose whether you want to filter by Author or by Title. If by title, do not change anything, as this option is selected by default. If by author, you should click the small circle next to the “Author” label.

Next, enter the author or title you are looking for into the “Search books on this shelf” bar. If you enter the name correctly and there are books on that shelf whose author/title begins with what you are typing, those book entries will be displayed, arranged alphabetically. If you enter something that does not exist on the shelf, you will see a box with the text “No books on the „Shelf name” shelf. To stop searching, simply remove everything from the search bar.

CHANGING BOOK INFORMATION

By clicking on a selected book from any shelf, information about it is displayed, which we can browse. This includes both general information as well as our notes and ratings. We can remove a book from our bookshelf by clicking the red “Delete position” button. Alternatively, we can click the dark blue “Edit details” button to edit the information about this book. After clicking it, we will see many fields that can be completed in the same way as when creating a new book. To save the changes, click the dark blue “Save Changes” button displayed at the bottom.

 Delete position

FRIENDSHIP SECTION

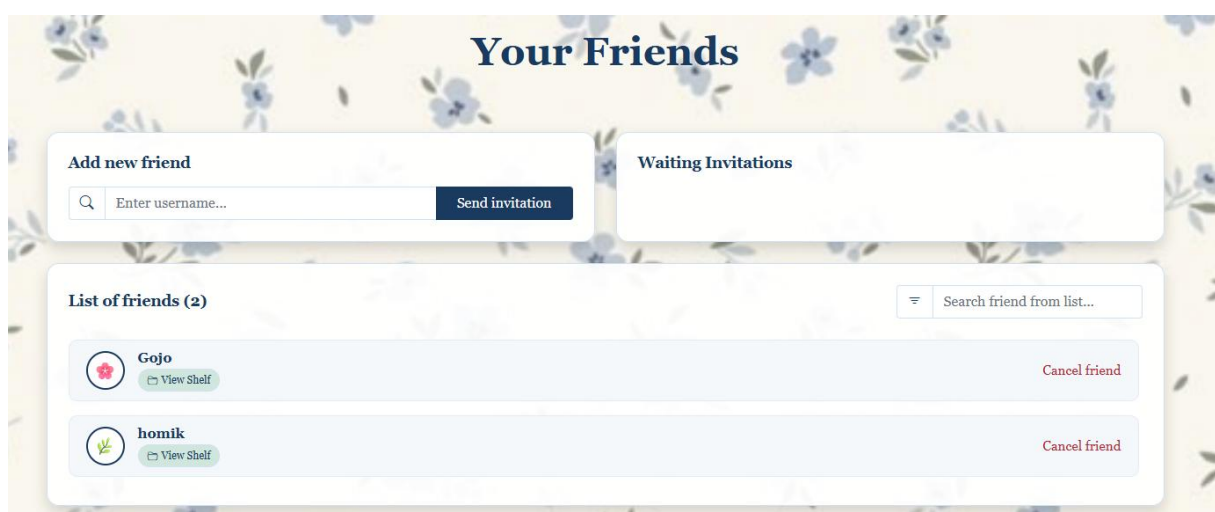

In the field below the “Add new friend” label, you can enter the login of another user and then click the dark blue button next to it – “Send invitation” – to add them as a friend. The entered login must be valid, meaning that a user with that login must exist. If it is not valid, the message “User not found” will be displayed, and the “Enter username...” field should be completed again. A successfully sent invitation will display a green bar with the text “Invitation sent”, and in order to become friends, the user to whom the invitation was sent must approve the request.

Waiting Invitations

If the other user has not yet approved the request, the request can be removed by clicking the red “Cancel” button. It is located in the “Waiting Invitations” field on the right-hand side. Click the “Cancel” button next to the user for whom you wish to cancel the friendship request. This applies when we are the ones sending the invitation.

If, however, we are the ones receiving a friendship request, we will also see it in the “Waiting Invitations” field. There, next to the relevant user, click either the green “Accept” button to add them to your friends list, or the red “Reject” button to decline the invitation.

List of friends

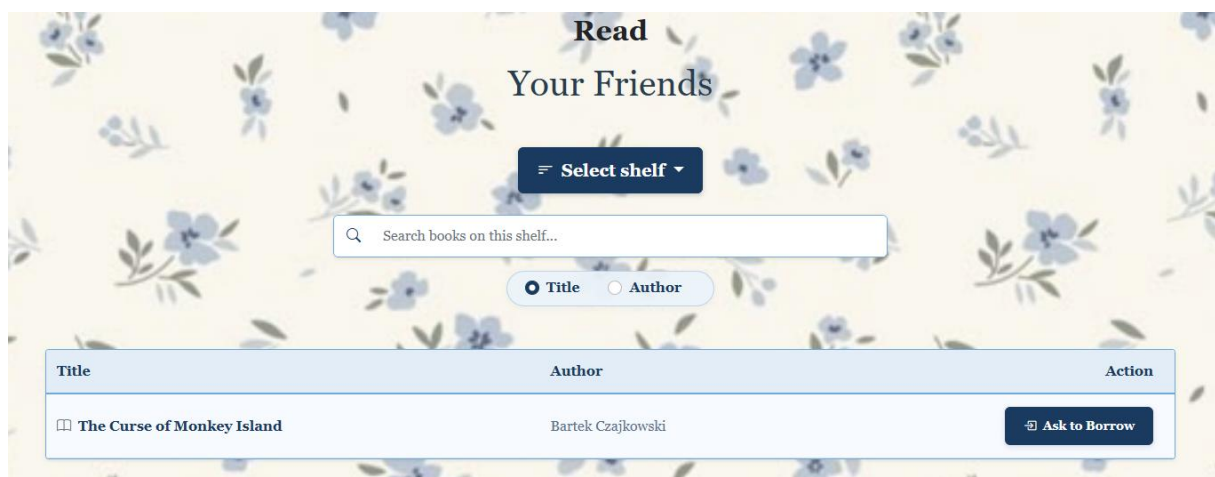

A little further down, we can see the “List of friends ()” field (the number in brackets indicates the number of friends we have). There, first and foremost, we can see the list of friends (those whose invitations have been confirmed). For each entry, we can see the user's login and avatar, a green “View shelf” button, and a red “Cancel friend” button.

The “View shelf” button, when clicked, takes us to the bookshelf view of that user. There, we can browse our friend's books or borrow a book (more about this in the manual step “BOOK BORROWING MECHANISM”). To leave this view, click the “Back” button in the top left-hand corner, and you will be taken back to the “Friendship” section of your own bookshelf.

The “Cancel friend” button, when clicked, removes the user from our friends list.

We can also use the search function, which works on our friends list. Enter the login, or the beginning of the login, that interests you into the “Search friend from list...” field in order to display friends whose logins match.

BOOK BORROWING MECHANISM

As described above, if we are viewing our friend's bookshelf, we can browse their various shelves in the same way that we switch between shelves on our own account. If a particular item is owned by our friend and is in a physical format, a dark blue “Ask to borrow” button will be visible to the right of that book. If we wish to borrow this book, we click it. This action will send a notification to our friend, a request that we would like to borrow that particular book from them, and we will see the message “Borrow request sent successfully!”.

The request to borrow a book is displayed in the “Friendship” section at the very top. To accept it, click the green “Lend” button. If you do not agree to the request, click the red “Reject” button so that the borrowing does not take place. (Of course, if we are the ones who sent the borrowing request, we can only wait for a notification).

Title	Author
 The Curse of Monkey Island (Borrowed from Friend)	Bartek Czajkowski

If the request is accepted, we will see the borrowed book in our bookshelf in the “My Shelf” section, and the bar containing that item will be highlighted in green (this is a simple way to distinguish that the book has been borrowed from someone. By default, the book is placed on the “To Read” shelf). By clicking on a borrowed book, we can view information about it, as well as who owns it. There are also two buttons at the bottom: “Back to shelf” and “Edit details”. Clicking the first one returns us to the view of our bookshelf. The second allows us to edit several entries: we can add bookmark usage (“Has Bookmark”), change the reading status (“Read status”), add the book's location (“Location”), or notes about the book (“Notes”). All of these fields are changed in the same way as when adding a new book. Likewise, when changing the status to “Read” or “DNF”, you can add your own review and rating, again in the same way as when creating a new book. To confirm the changes, click the “Save Changes” button. However, we may choose not to do so and instead click the “Cancel” button.

Return Book

Are you done reading?
Give the book back to its owner.

Return Book

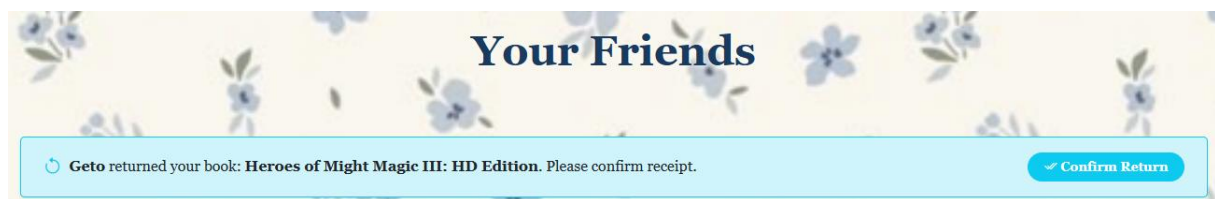

Cancel

Save Changes

At the moment when the borrowing is active, the person lending the book does not have it on their shelf.

To return a borrowed book, click the “Return book” button located in the red field area at the bottom of “Edit Book Settings”.

A book that is being returned to its owner must have its return confirmed by clicking the blue “Confirm Return” button, which will appear to notify about the return. This notification will appear at the top of the “Friendship” section.

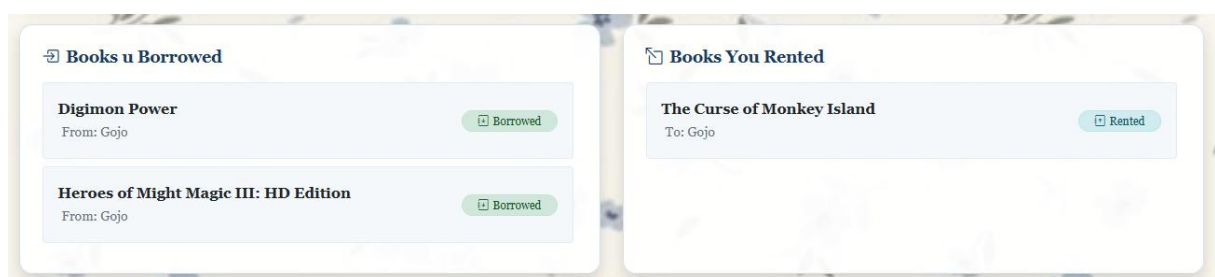

BORROWING SECTIONS

At the bottom of the “Friendship” section, there are 4 fields: “Books you borrowed”, “Book You Rented”, “Borrowed History”, and “Rented History”.

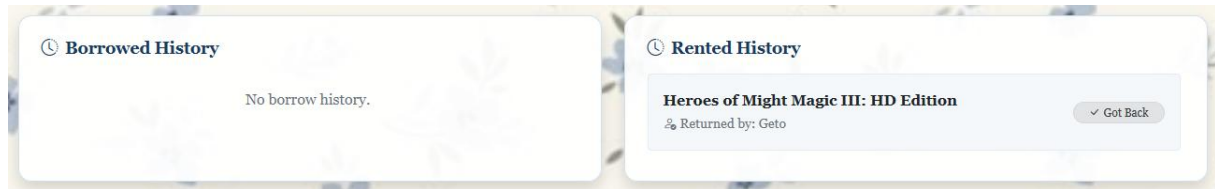

“Books you borrowed” displays the books that you have borrowed from someone, showing the book title and the login of the lender. (These are the books that you currently have on loan)

“Books You Rented” displays the books that you have lent to someone, showing the book title and the login of the friend to whom you lent the book. (These are the books that you are currently lending)

“Borrowed History” displays the books that we have lent to someone, but which have already been returned; it is a reference history of borrowings.

“Rented History” displays the books that someone lent to us and which we have already returned; it is a reference list of such items.

ADMINISTRATION PANEL

To gain access to the administrative panel, you must log in to the administrator account:

In the “EmailOrLogin” field, enter: admin@yourlibrary.com

In the “Password” field, enter: „SecureAdmin2026!”

Click “LOG IN”

While logged into the administrator account, we have access to the application and the bookshelf in the same way as a regular user. However, we additionally have the text “Admin Dashboard” in the menu at the top left-hand corner. By clicking it, we can access the panel visible only to administrators.

In this panel, we can check the number of registered users – the “Total Users: ” field.

We can browse the list of users, where we can see their login, email, and “User ID” user identifier. To search for a specific user, use the “Find user by email or login” field. After entering either a login or a name, matching users will be displayed.

Next to each user, there is a “Delete” button. This button deletes the account of the given user; only an administrator can perform such an action.
